Subject: Any NASA Goddard/MSFC/JSC hams on this newsgroup?
To: info-hams@ucsd.edu

The NASA Langley Amateur Radio Club is trying to make a comeback
and one of our goals is to rebroadcast space shuttle orbiter
communications. If any Goddard/MSFC/JSC/etc. ham has information

regarding doing so from a government installation please email me at:

    watson@asdsun.larc.nasa.gov
    (804) 864-1233

Thanks in advance.

QST de W1AW
ARRL Bulletin 73 ARLB073
>From ARRL Headquarters
Newington CT July 9, 1993
To all radio amateurs

SB QST ARL ARLB073
ARLB073 449 mHz plan opposed

449 MHz plan opposed

The League has told the FCC that a proposal to allocate the
frequency 449 MHz for wind profiler radar systems should be based
only on careful coordination processes and site selection, to avoid
interference to amateurs, who share on a secondary basis the band
420-450 MHz with government (military) radiolocation operations.

In April the FCC issued an Notice of Proposed Rule Making (in ET
Docket 93-59) to make the allocation, and asked for comments on
whether wind profilers should also be accommodated in the 915 MHz
band or elsewhere.

The League told the FCC that the 420-450 MHz band is heavily used by
the Amateur Radio Service, especially for FM repeaters, it being the

second most popular VHF/UHF amateur allocation, with more than 5,000
repeaters.

These repeaters are used for public service communications,
especially in metropolitan areas, and are important in the
connection between Amateur Radio and the government's SKYWARN severe
weather warning system, the League said.

The League said that it appears possible that government wind
profilers could be used in this band without disrupting existing
amateur operations, but only with proper coordination, and that
non-government profilers could present even more serious
interference possibilities. More information is in QST for May
1993, page 88.

---- ---- : ---- ----- : ----- : ---
 298   24 : Yes Yes :   Yes : rec.radio.scanner

This vote was conducted by a neutral third party. For voting
questions, contact rdippold@qualcomm.com. For questions about the
proposed group, contact Risto Kotalampi (rko@cs.tut.fi).

CHARTER

rec.radio.scanner is a newsgroup for discussion about "utility"
traffic above 30 MHz. FM & TV-broadcasting, shortwave, amateur radio
and broadcast satellite-related material doesn't belong to
rec.radio.scanner because they have their own newsgroups. This
newsgroup replaces alt.radio.scanner. In addition, the
rec.radio.scanner will be gatewayed to a mailing list which will be

created as soon as possible after newsgroup creation, as there are
many who do not have access to USENET news.

Subject: TS-50S RS232 Prgramming?
To: info-hams@ucsd.edu

I just purchased a Kenwood TS-50S. Does anyone have, or know where I can get,
programming information for the RS-232 port? I would guess that the program
I wrote for the TS-440S's serial port will probably work.

Thanks, Wayne Roth WA2N.
